Ratings definition (ISO-8528)

ESP - Emergency Standby Power: It is the maximum power available during a variable electrical power sequence, under the stated operating conditions, for which a generating set is capable of delivering in the event of a utility power outage or under test conditions for up to 200 h of operation per year with the maintenance intervals and procedures being carried out as prescribed by the manufacturers. The permissible average power output over 24 h of operation shall not exceed 70 % of the ESP.

PRP - Prime Power: It is defined as being the maximum power which a generating set is capable of delivering continuously whilst supplying a variable electrical load when operated for an unlimited number of hours per year under the agreed operating conditions with the maintenance intervals and procedures being carried out as prescribed by the manufacturer. The permissible average power output over 24 h of operation shall not exceed 70 % of the prime power.

Mechanical structure

Robust mechanical structure which permits easy access to the connections and components during routine maintenance check-ups.

Voltage regulator

Voltage regulation with DSR. The digital DSR controls the range of voltage, avoiding any possible trouble that can be made by unskilled personnel. The voltage accuracy is ±1% in static condition with any power factor and with speed variation between 5% and +30% with reference to the rated speed.

Windings / Excitation system

Generator stator is wound to 2/3 pitch. This eliminates triplen (3rd, 9th, 15th ...) harmonics on the voltage waveform and is found to be the optimum design for troublefree supply of non-linear loads. The 2/3 pitch design avoids excessive neutral currents sometimes seen with higher winding pitches. MAUX (Standard): The MAUX MeccAlte Auxiliary Winding is a separate winding within the main stators that feeds the regulator. This winding enables to take an overload of 300% forced current (short circuit maintenance) for 20 seconds. This is ideal for motor starting requirements.

Insulation / Impregnation

Insulation 7 impregnation Insulation 7 impregnation Insulation is of class H standard. Impregnation is made with premium tropicalised epoxy resins by dipping and dripping. High voltage parts are impregnated by vacuum, so the insulation level is always very good. In the high-power models, the stator windings undergo a second insulation process. Grey protection is applied on the main and exciter stator to give enhanced protection.

Reference standards Alternator manufactured according to , and complies with , the most common specification such as CEI 2-3, IEC 34-1, EN 60034-1, VDE 0530, BS 4999-5000, CAN/ CSA-C22.2 No14-95-No100-95.

Genset equipment

BASE FRAME MADE OF WELDED STEEL PROFILE, COMPLETE WITH:

- Anti-vibration mountings properly sized
- Welded or Screwed support legs. (according to canopy size)

PLASTIC FUEL TANK WITH THE FOLLOWING COMPONENT:

- Filler neck
- Air breather (ventilation pipe)
- · Minimum fuel level sensor

OIL DRAININ PIPE WITH CAP:

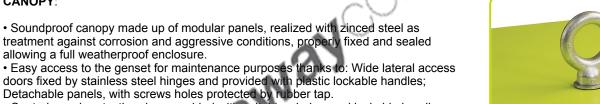

· Oil draining facilities

ENGINE COMPLETE WITH:

Battery

CANOPY:

· Liquids (no fuel)

allowing a full weatherproof enclosure. anowing a run weatnerproor enclosure.
Easy access to the genset for maintenance purposes thanks to: Wide lateral access doors fixed by stainless steel hinges and provided with plastic lockable handles; Detachable panels, with screws holes protected by rubber tap.
Control panel protection door provided with suitable window and lockable handle.
Lateral air inlet opening properly protected and soundproofed. Exhaust air outlet from the roof, trough wet section protected by proper grid.
Single detachable lifting eye placed on the roof.

SOUNDPROOF:

- · Noise attenuation thanks to soundproofing material
- · Efficient residential silencer placed inside the canopy

U

Mounted on the genset and complete of: analogue instrumentation, control, protection of the generating set, protected through door with lockable handle.

INSTRUMENTATION (ANALOGUE)

- Voltmeter (1 phase)
- Ammeter (1 phase)
- Hours-counter

COMMANDS

- · Start/stop selector switch with key
- Emergency stop button

PROTECTION WITH ALARM

- Low fuel level
- Battery charger failure
- · low oil pressure
- high engine temperature
- Earth Fault.

PROTECTIONS WITH SHUTDOWN

OTHERS PROTECTIONS • Panel protected through door with lockable handle.

Power cables connection to Circuit Breaker.		
External Terminal Board (ETB)		Optional
Socket kit		Optional
3P+N+T 400V 63A	n	
3P+N+T CEE 400V 32A	n	

MPF - Manual control panel full option

Mounted on the genset and complete of: analogue instrumentation, control, protection of the generating set, protected through door with lockable handle

INSTRUMENTATION (ANALOGUE)

- · Voltmeter with selector switch (3 phases)
- Frequency meter
- Ammeter with selector switch (3 phases)
- Hours-counter
- Fuel level indicator
- Oil pressure indicator
- Engine temperature indicator

COMMANDS

- · Start/stop selector switch with key
- Emergency stop button

PROTECTION WITH ALARM

- · Low fuel level
- Battery charger failure
- low oil pressure
- · high engine temperature
- Earth Fault

PROTECTIONS WITH SHUTDOWN

- · Low fuel level
- · Battery charger failure
- · low oil pressure

www.pramac.com

- high engine temperature
- Circuit breaker protection: III poles
- Emergency stop button

ACP - Automatic control panel

Mounted on the genset, complete with digital control unit for monitoring, control and protection of the generating set, protected through door with lockable handle

DIGITAL INSTRUMENTATION

- Generating set voltage (3 phases)
- Mains voltage
- Generating set frequency
- Generating set current (3 phases)
- · Battery voltage
- Power (kVA kW kVAr)
- Power factor Cos φ
- Hours-counter • Engine speed r.p.m.
- Fuel level (%)
- · Engine temperature (depending on model)

COMMANDS AND OTHERS

- Four operation modes: OFF Manual starting Automatic starting Automatic test
- · Pushbutton for forcing Mains contactor or Genset contactor
- · Push-buttons: start/stop, fault reset, up/down/page/enter selection
- Remote starting availability
- DC system disconnection switch
- Acoustic alarm
- Automatic battery charger
- RS232 Communication port
- Settable PASSWORD for protection level

PROTECTIONS WITH ALARM

- · Engine protections: low fuel level, low oil pressure, high engine temperature
- Genset protections: under/over voltage, overload, under/over frequency, starting
- failure, under/over battery voltage

PROTECTIONS WITH SHUTDOWN

- · Engine protections: low fuel level, low oil pressure, high engine temperature
- · Genset protection: under/over voltage, overload, under/over battery voltage, battery charger failure
- · Circuit breaker protection: III poles

Power cables connection to Circuit Breaker.	
Predisposed for remote control optional:	RCG
External Terminal Board (ETB)	Optional
Socket kit	Optional

Socket kit

To be ordered with equipment (when necessary)

CONTROL PANEL SUPPLEMENT

SKB socket kit B - available for models:

Individual CB and Earth Fault protection

RCG - Various supplements for remote controls - available for models:	ACP MPP
TLP - Various supplements for remote signals - available for models:	ACP MPP
ADI - Adjustable Differential Intensity - available only for models:	ACP
TIF - IV Poles Circuit Breaker instead of III - available for models:	ACP MCP
ETB - External Terminal Board - available for models:	MCP ACP

LTS

LTS - Load Transfer Switch [Accessories for ACP Automatic Control Panel]

The Load Transfer Switch (LTS) panel operates the power supply changeover between the generator and the Mains in backup applications, guarantying the feeding to the load within a short period of time.

It consists of a standalone cabinet which can be installed separate from the generating set. The logic control of the power supply changeover is operated by means of the Automatic Control Panel (ACP) mounted on the generating set, so therefore none logic device is required on the LTS panel.

- **LTS Type ATyS_D:** Box type: steel enclosures •
- Installation mode: Wall mounted <400A; Floor Standing =>630A
- Door: Hinged door closed with double barb locking.
- Ingress Protection: IP43
- Gland Plates: Removable on the top & bottom side ٠
- Connections: Bottom/Bottom
- Motor unit
- Gland Plates: Removable on the top & bottom side
- Connections: Bottom/Bottom
- Motor unit ٠
- Switch position indicator
- Auto/Manual cover selector •
- Housing for manual handle
- Padlocking mechanism .
- Two side by side mounted load break switches
- Poles 4
- •
- Double coils self-powered Voltage (coils): 208/277VAC (Tolerance+/-20% 166/333VAC) .
- Frequency 50 & 60HZ
- Interface ATyS D10, fixed on the door for the status indication: Two lights to indicate the voltage presence of the grid and the diesel generator; Two lights for the switch position; Functionality mode (auto/manual) and cover protection IP65. *Compliant with IEC 60947-3, EN 61439-6-1 and GE 14048-11*

- LTS SUPPLEMENTS AVAILABLE ON REQUEST: **ESB** Emergency Stop Button (installed on the panel front) **APP** Additional IPXXB Protection (internal plexiglass)
