

## GBW22Y (ALT. M)

		SIN	St. CON
Main Features			
Frequency	Hz	50	
Voltage	V	400	
Power factor	cos φ	0.8	
Phase	10.	3	
	-114		

Power Rating		
Emergency Standby Power ESP	kVA	19.25
Emergency Standby Power ESP	kW	15.40
Prime power PRP	kVA	18.27
Prime power PRP	kW	14.62

#### Ratings definition (ISO-8528)

**ESP** - Emergency Standby Power: It is the maximum power available during a variable electrical power sequence, under the stated operating conditions, for which a generating set is capable of delivering in the event of a utility power outage or under test conditions for up to 200 h of operation per year with the maintenance intervals and procedures being carried out as prescribed by the manufacturers. The permissible average power output over 24 h of operation shall not exceed 70 % of the ESP.

**PRP** - Prime Power: It is defined as being the maximum power which a generating set is capable of delivering continuously whilst supplying a variable electrical load when operated for an unlimited number of hours per year under the maintenance intervals and procedures being carried out as the agreed operating conditions with the maintenance intervals and procedures being carried out as prescribed by the manufacturer. The permissible average power output over 24 h of operation shall not exceed 70 % of the prime power.

Engine specifications			
Engine Brand		Yanmar	
Model	4TNV88-	BGPGEC	
[50Hz] Exhaust emission level		Stage II	
Engine cooling system		Water	
Nr. of cylinder and disposition		4 in line	0
Displacement	ст³	2190	
Aspiration		Natural	
Speed governor		Mechanical	
Prime gross power PRP	kW	17.3	
Maximum gross power LTP ESP	kW	18.2	
Oil capacity	I	7.4	
Coolant capacity	Ι	2.7	
Fuel		Diesel	
Specific fuel consumption 75% PRP	g/kWh	245	(
Specific fuel consumption PRP	g/kWh	245	C
Starting system		Electric	
Starting engine capability	kW	1.4	$\langle 2 \rangle$
Electric circuit	V	12	10
Engine Equipment		XÌ	

#### **Engine Equipment**

#### Standards

The above ratings represent the engine performance capabilities to conditions specified in ISO 8528/1, ISO 3046/1:1986, BS 5514/1 ollaway

#### Fuel system

- Direct injection system
- Fuel filter paper element
- Fuel pump Bosch in-Line

#### Lube oil system

- Forced feed system
- Trochoid pump
- Paper element lube oil filter

#### Induction system

#### Mounted air filter

#### Cooling system

• Thermostatically-controlled system with gear-driven circulation pump and belt-driven

pusher fanMounted radiator and piping

Alternator Specifications		
Alternator		Mecc Alte
Model		ECP28-M4 C
Voltage	V	400
Frequency	Hz	50
Power factor	cos φ	0.8
Poles		4
Туре		Brushless
Voltage tolerance	%	1
Efficiency @ 75% load	%	88,2
Class		Н
IP protection		23

#### Mechanical structure

Robust mechanical structure which permits easy access to the connections and components during routine maintenance check-ups.

#### Voltage regulator

Voltage regulation with DSR. The digital DSR controls the range of voltage, avoiding any possible trouble that can be made by unskilled personnel. The voltage accuracy is  $\pm 1\%$  in static condition with any power factor and with speed variation between 5% and +30% with reference to the rated speed.

# Ger

.....

Windings / Excitation system

Generator stator is wound to 2/3 pitch. This eliminates triplen (3rd, 9th, 15th ...) harmonics on the voltage waveform and is found to be the optimum design for trouble-free supply of non-linear loads. The 2/3 pitch design avoids excessive neutral currents sometimes seen with higher winding pitches. MAUX (Standard): The MAUX MeccAlte Auxiliary Winding is a separate winding within the main stators that feeds the regulator. This winding enables to take an overload of 300% forced current (short circuit maintenance) for 20 seconds. This is ideal for motor starting requirements.

#### Insulation / Impregnation

Insulation is of class H standard. Impregnation is made with premium tropicalised epoxy resins by dipping and dripping. High voltage parts are impregnated by vacuum, so the insulation level is always very good. In the high-power models, the stator windings undergo a second insulation process. Grey protection is applied on the main and exciter stator to give enhanced protection.

#### Reference standards

Alternator manufactured according to , and complies with , the most common specification such as CEI 2-3, IEC 34-1, EN 60034-1, VDE 0530, BS 4999-5000, CAN/ CSA-C22.2 No14-95-No100-95.

### BASE FRAME MADE OF WELDER STEEL PROFILE, COMPLETE WITH:

- · Anti-vibration mountings properly sized
- · Visual fuel level indicator
- Integrated support legs.

### PLASTIC FUEL TANK, COMPLETE WITH:

- Filler neck
- Air breather (ventilation pipe)
- · External fuel refilling

## **OIL DRAININ PIPE WITH CAP:**

· Oil draining facilities

· Simple handling operations with central lifting eye

CANOPY:

awai • Noise attenuation thanks to soundproofing material (polyurethane foam) and efficient residential silencer placed inside the canopy.

Dimensional data		
Length	(L) mm	1645
Width	(W) mm	870
Height	(H) mm	1063
Dry weight	kg	580
Fuel tank capacity	I	51
Fuel tank material		Plastic

Autonomy		
Fuel consumption @ 75% PRP	l/h	3.78
Fuel consumption @ 100% PRP	l/h	5.05
Running time 75% PRP	h	13.49
Running time 100% PRP	h	10.10

Installation data		
Total air flow	m³/min	58.08
Exhaust gas flow	m³/min	3.5
Exhaust gas temperature	°C	470

**Electrical Data** 

**Control panel availability** MANUAL CONTROL PANEL

AUTOMATIC CONTROL PANEL

Max current Circuit breaker

#### ACP - Automatic control panel

Automatic control panel mounted on the genset, complete with digital control unit for monitoring, control and protection of the generating set.

#### INSTRUMENTATION DIGITAL

- · Mains voltage.
- Generating set voltage (3 phases).
- · Generating set frequency.
- Generator set current.
- · Battery voltage
- · Hours-counter.

#### **COMMANDS AND OTHERS**

- · Operation modes: OFF Manual Starting Automatic Starting.
- Push-buttons: start/stop, fault reset, up/down/page/enter selection.
- · Emergency stop button.
- Remote starting availability.
- · Automatic battery charger.
- USB port.

#### **PROTECTIONS WITH ALARM**

- Engine protections: low oil pressure, high engine temperature
- · Genset protections: under/over voltage, overload, under/over frequency, starting
- failure, under/over battery voltage, battery charger failure

#### **PROTECTIONS WITH SHUTDOWN**

- ant. .uer/ove · Engine protections: low oil pressure, high engine temperature
- · Genset protection: under/over voltage, overload, under/over battery voltage
- · Circuit breaker protection: III poles
- Differential protection

#### **OTHERS**

Cover protection Power switch

#### ELECTRIC DISTRIBUTION PANEL ACP

#### LTS - Load Transfer Switch [Accessories for ACP Automatic Control Panel]

Mains/group switching panel, supplied in a special metal box/cabinet designed for coupling with Pramac ACP version generator sets.

#### Main components:

- Four-pole mains/group switching (contactors)
- Metal carpentry
- Emergency button positioned on the front panel
- Mechanical and electrical interlock
- Power connection terminal blocks (network; group; use)
- Multipolar connection cable L TS/ACP commands and controls

The complete ACP + L TS system controls the distribution network and, in the event of an interruption or anomaly, automatically starts the engine and within a few seconds supplies the load with the generator set, when the mains voltage returns to the nominal value, it switches automatically the load on the mains and, after a suitable coling time, stops the motor.
