

# **RX 10/16 EVO GEL**

# FULLY FEATURED COMPACT STACKER

## **MONO MAST STACKER**

RX is the most compact in the stackers' range, single mast, completely electric, suitable for loads up to 1.000 kg, allowing a comfortable, safe use, with low maintenance costs, thanks to robust design with easy access for maintenance. RX combines compactness and ergonomics, covering a wide range of daily applications in the "light duty" area (not for continuous use).

# **RX EVO GEL**

The EVO version is equipped with powerful GEL batteries that allow long endurance and large number of charging cycles. The ergonomic technopolymer tiller offers a comfortable grip. A specific electronic control enables lifting the forks with a proportional usage.

## TILLER EVOLUTION

Fully integrated ergonomic technopolymer tiller system including finger tip throttle and proportional fork controls, safety pushbutton, horn, turtle button, hourmeter, battery status indicator as standard equipment.

## **TURTLE MODE SWITCH**

Offered as standard, this function enables operating the truck in confined spaces: it allows the unit to travel with the tiller in upright position.

This function is activated by pressing the turtle button on the tiller and rotating the drive control throttle. The truck travels at limited speed.

Release the button to disable this function.

#### **VERSATILITY**

It's ideal to move, even horizontally, palletized goods and at the same time it can be used as an adjustable workable, reducing stress for the operator who must place goods on a shelf. Forks thickness 60 mm for an easier entrance inside pallet, while working in elevation.

#### **EASY MAINTENANCE**

Strong ABS carter/cover with storage compartments on top. Easily removable to speed up maintenance operations.

The bottom access opening allows an immediate disassembly of motor wheel, portal and tiller without lifting the machine.

#### **ERGONOMICS**

Ergonomic tiller placed laterally to increase visibility, ensuring an optimal arrangement of components inside the motor compartment. RX 10 solves perfectly the problem of handling goods in narrow spaces and corridors.

# **BATTERY PACK GEL**

The use of powerful high energy throughput GEL batteries makes the machine extremely flexible in every application, thanks to the multiples benefits of GEL technology, such as:

- Maintenance-free (no topping up)
- Long service life
- High number of cycles (IEC 60254-1)
- · Extraordinary deep discharge protection
- Low self discharge rate
- Superior shelf life
- No acid stratification

#### **AUTOLEVELLING SYSTEM (OPTIONAL)**

This device allows an automatic forks lifting and lowering control depending on the load height.

The positioning of the sensor is easy adjustable through the magnets and can be done on both side of the mast for maximum ergonomic.

The operator safety is granted by limit switches and a beeper that advice the beginning of the action.

Autolevelling can be offered also as a retrofit available for all the RX10 EVO range.

Description			
1.1 Manufacturer			PR INDUSTRIAL
1.3 Drive			ELECTRIC
1.4 Operator type			Pedestrian
1.5 Load capacity	Q	kg	1000
1.6 Load centre distance	С	mm	600
1.8 Load axle to end forks	Х	mm	786
1.9 Wheel base	у	mm	1165
